

Advanced & Personalized Dental Care in Mumbai

Your Smile. Our Expertise. Your Confidence.

Dentalfix Clinic is a modern dental practice located in **Vile Parle East, Mumbai**, committed to providing personalised, comfortable, and technology-driven dental care. The clinic combines professional expertise, advanced dental technology, and patient-focused treatment to help individuals and families maintain healthy and confident smiles.

About Dentalfix Clinic

At Dentalfix Clinic, dental care goes beyond treating individual problems. The clinic focuses on understanding each patient's requirements and developing personalised treatment plans.

Led by **Dr. Dipika Bharani, Dental Surgeon and Cosmetic & Aesthetic Dentist**, the clinic brings together a multidisciplinary team of dental professionals covering areas such as orthodontics, periodontics, endodontics, pediatric dentistry, oral and maxillofacial surgery, and general dentistry.

The clinic's approach combines modern dentistry with patient comfort, safety, and personalised care.

Our Dental Services

Dentalfix Clinic offers a comprehensive range of dental treatments, including:

Cosmetic Dentistry

Cosmetic dental treatments can help improve the appearance of teeth and create a more confident smile.

Dental Implants

Dental implants are an option for replacing missing teeth and restoring dental function and appearance when clinically appropriate.

Root Canal Treatment

Root canal treatment can help manage an infected or damaged tooth and may help preserve the natural tooth.

Braces & Aligners

Orthodontic treatments such as braces and clear aligners can help address teeth alignment and bite-related concerns.

Crowns & Bridges

Crowns and bridges can be used as restorative solutions for damaged or missing teeth.

Pediatric Dentistry

Dentalfix provides dental care designed around the specific needs of children, from early dental visits through their growing years.

Gum Treatments

Periodontal care focuses on maintaining healthy gums and managing gum-related dental concerns.

Laser Dentistry

Advanced laser technology can be used for selected dental and gum procedures.

Smile Correction & Full Mouth Reconstruction

For patients requiring comprehensive dental rehabilitation, treatment can be planned around individual oral health and aesthetic requirements.

Advanced Dental Technology

Dentalfix Clinic uses modern technology to support diagnosis, treatment planning, and patient care.

The clinic highlights technologies and facilities including:

- Digital impressions
- Soft tissue laser technology
- Class B autoclave sterilisation
- Digital dentistry
- Advanced diagnostic equipment
- Radiation-safety measures

Digital impressions can assist with accurate 3D capture of teeth for treatments such as crowns and aligners, while laser technology can support selected gum procedures.

Patient-Centred Dental Care

A visit to the dentist can sometimes make patients feel anxious. Dentalfix Clinic focuses on creating a comfortable environment and providing personalised care throughout the treatment journey.

From the initial consultation and diagnosis to treatment planning and aftercare, the team aims to keep patients informed and comfortable.

The clinic also provides dental care for different age groups, including children, adults, and senior patients.

Why Choose Dentalfix Clinic?

Modern Technology

Advanced dental tools and techniques support diagnosis and treatment.

Personalised Treatment

Treatment plans are developed according to individual dental requirements.

Multidisciplinary Team

The clinic has specialists across several areas of dentistry.

Patient Comfort

The focus is on creating a comfortable and supportive dental experience.

Comprehensive Dental Care

Patients can access a wide range of preventive, cosmetic, orthodontic, restorative, and specialised dental treatments in one clinic.
